No GE Fish Research, Production, Consumption in, and Export from, Canada

To protect the health and future of our food system and our aquatic ecosystems, we, the undersigned:

- 1. State our categorical objection to the introduction of genetically engineered (GE) fish into our food system;*
- 2. Object to the raising of GE fish, whether in open netpens or land-based facilities, object to the production of GE fish eggs in Canada and their export from Canada to other countries, and object to the use of public resources for the research and development of GE fish;*
- 3. We call upon Environment Canada to reject any request for permission to commercially produce genetically engineered fish or fish eggs;*
- 4. We call upon Health Canada to reject any application for approval of genetically engineered fish for human consumption;*
- 5. We call upon the federal government to stop any current risk assessments of GE fish.*
