Subject: Diamond Foods getting back to you

Hello Larissa:

Thank you for contacting us regarding the use of neonicotinoid on Pop Secret corn kernels.

We are committed to working with our popcorn supplier to remove neonicotinoid chemicals from being used on the popcorn supply we purchase. Our popcorn supplier has committed to removing 50% of its neonicotinoids usage in 2016, and 75% in 2017, with a long-term commitment of further reducing usage by working with agricultural universities and those companies supplying neonicotinoids to the seed industry.

Sincerely,

Erika
