

PLANT FOR POLLINATORS

A GUIDE FOR THE SOUTHEAST REGION

BEES AND OTHER BENEFICIAL POLLINATORS are disappearing at alarming rates. While we may not know the exact cause of the disappearance, we do know that some pesticides are contributing to their decline. But we also know there are simple things we can each do to help combat pollinator loss. By making simple choices such as choosing to plant pollinator-friendly plants to provide bees forage, we can all help address this crisis.

BEE Protective

*Planting seasons are listed based on approximate times of bloom; some flowers may have times of bloom beyond these seasons.

SPRING AND EARLY SUMMER	MID-SUMMER	LATE SUMMER AND FALL
American Alumroot	Black-eyed Susan	Buttonbush*
Blueberry*	Carolina Rose	Devil's Darning Needles
Butterfly Milkweed	Eastern Rosemallow	Giant Ironweed
Eastern Redbud*	Fall Phlox	Hyssopleaf Thoroughwort
